Professional Summary

With more than three years of expertise as a Business Intelligence Developer, I provide SQL Server, SSRS, and Power BI reporting solutions that enhance operational visibility, reporting accuracy, and corporate decision-making. solid foundation in data modelling, dashboard design, SQL creation, query optimization, and automated reporting. a track record of using process automation and reporting improvements to reduce invoicing errors by 90%, reduce manual reconciliation by 70%, and improve query and report performance by 30%. knowledgeable about obtaining business requirements and converting them into high-impact, scalable BI solutions.

Technical Skills

Business Intelligence & Reporting: SSRS, Power BI, KPI Dashboards, Operational Reporting, Financial Reporting, Data Visualisation.

SQL & Database Development: SQL Server, Stored Procedures, Views, Query Optimisation, Database Performance Tuning.

Data & Analytics: Data Analysis, Data Modelling, ETL Concepts, Data Transformation, Data Validation, Business Requirements Analysis.

Tools & Platforms: Azure DevOps, Git, GitHub, SQL Server Agent, Excel, Microsoft Office.

Professional Experience

Business Intelligence Developer / Data Analyst

Inspired Change Solutions | April 2022 – Present

- Designed and delivered SSRS reports supporting operational, financial, and performance reporting requirements.
- Developed KPI dashboards in Power BI and SSRS to provide business-critical insights into service delivery, utilisation, and compliance.
- Wrote and optimised T-SQL queries, stored procedures, and views to improve data retrieval and reporting efficiency.
- Improved report execution and SQL query performance by approximately 30% through optimisation and refactoring.
- Collaborated with stakeholders to gather reporting requirements and translate them into scalable BI solutions.
- Automated key reporting processes, reducing manual reconciliation effort by 70%.
- Enhanced invoice and statement reporting, contributing to a 90% reduction in invoicing errors.
- Improved technician scheduling and utilisation reporting, reducing manual reporting effort by 75%.

Worked On Projects

SLA Monitoring Dashboard | SQL Server, SSRS, Power BI

Developed automated SLA compliance reporting to improve service performance monitoring and operational visibility.

Ticketing & Service Desk Dashboard | SQL Server, SSRS, Power BI

Built reporting solutions to track ticket volumes, service trends, turnaround times, and service desk performance.

Insurance Bordereaux & Commission Reporting | SQL Server, T-SQL, SSRS

Automated bordereaux and commission reporting, reducing manual reconciliation effort by 70%.

Invoice & Statement Reporting | SQL Server, SSRS

Improved reporting accuracy and validation processes, reducing invoicing errors by 90%.

Technician Scheduling & Utilisation Reporting | SQL Server, SSRS

Developed operational reporting that reduced manual reporting effort by 75% and improved scheduling visibility.
